Jashore University of Science and Technology Bachelor of Science with Honours in Physics

Second semester of Second year Course title: Semiconductor Physics Course code: PHY 2207

| Quiz no.: 01 | | Date: September 03, 2023 |
|----------------------------------|--|---|
| Roll: | | |
| 1. Define semiconductor a | and conductor using the concept energy | y bands. [6 |
| | | |
| 2. An <i>n</i> -type semiconduct | for material is electrically neutral and | not negatively charged. Why? [3 |
| 3. What is meant by 1 eV | ? How temperature can be converted | in eV? Explain with example. $_{\left[5 ight]}$ |
| 4. What is extrinsic semice | onductor? Explain how n -type semicon | nductors can be formed by doping $[\epsilon]$ |
| | | |
